4. a. $4 + 3 = \underline{7}$. They have seven kittens altogether.
 $4 - 3 = \underline{1}$. The black cat has one more kitten.
b. $1 + 2 + \underline{4} = 7$ or $7 - 3 = \underline{4}$.
Four birds were brown.
c. $2 + 2 + \underline{6} = 10$ or $10 - 4 = \underline{6}$.
Six of the roses were yellow.
d. $2 + 3 = 5$ eggs. No. She will not have enough.
 $8 - 5 = \underline{3}$. She still needs three eggs.

3. There are a total of 18 squares. There are twelve green squares around the outside, plus one square in the middle, plus the overall outside square, plus a square in each corner as the illustration shows (four total). So there are $12 + 1 + 1 + 4 = \underline{18}$ squares.
4. There are a total of nine rectangles. There is one large rectangle, which is divided into four smaller ones. The top two and the bottom two rectangles can be put together to make longer ones. The left two and the right two can be put together to make taller rectangles. So there are $1 + 4 + 2 + 2 = \underline{9}$.
5. The shapes can be divided in different manners. Check the student's work, and listen to the student naming their shapes. One example of each is shown below.

---	---

4. Yes, you can still use the trick with 9. You simply take 1 away from the other number and add it to 9. For example, $5 + 9$ would become $4 + 10 = 14$.

5. a. $2 + 1 = 3$. Aaliyah and her brother ate 3 apples.
 $9 - 3 = \underline{6}$. There are six apples left.
 b. $9 - 7 = \underline{2}$. Oliver picked two more flowers than Alice.
 $9 + 7 = \underline{16}$. The children picked 16 flowers altogether.

7. a. $5 + 6 = \underline{11}$

b. $9 + 8 = \underline{17}$

c. $2 + 9 = \underline{11}$

d. $7 + 8 = \underline{15}$

e. $6 + 7 = \underline{13}$

8. a. Should be $6 + 6 = \underline{12}$ or $7 + 6 = 13$
 b. Should be $\underline{13} = 4 + 9$ or $12 = \underline{3} + 9$ or $4 + \underline{8}$.
 c. Correct.
 d. Should be $\underline{16} = 9 + 7$ or $17 = \underline{10} + 7$ or $9 + \underline{8}$.

5. a. $7 + 6 = \underline{13}$. She found thirteen uniforms.
 b. $13 - 3 = \underline{10}$. She had to wash ten uniforms.
 c. $8 - 5 = \underline{3}$. There were three more girls.
 d. $8 + 5 = 13$. She had 13 uniforms, and there were thirteen boys and girls who came to play softball, so she had enough uniforms. She doesn't need any more uniforms, and there are none left over.

2. a. Jim read the fewest books.
b. $10 - 3 = 7$ Janet read seven more books than Jim.
c. $10 + 3 + 7 = 20$ They read 20 books altogether.
d. Questions will vary. Check that it fits the graph (and is math related) and the answer is correct.
Some examples:

How many more books did Jose read than Jim?
 $7 - 3 = 4$

How many fewer books did Jose read than Janet?
 $10 - 7 = 3$

How many books did Jose and Janet read altogether?
 $10 + 7 = 17$

3. Any one of these could also be answered, "I just know it!"

- a. $6 + 7 = 13$ Just one more than a double
b. $4 + 9 = 13$ Trick with nine
c. $8 + 8 = 16$ Doubles facts OR Trick with eight
d. $3 + 8 = 11$ Trick with eight OR "Just one more" than a sum with 10
e. $6 + 5 = 11$ Just one more than a double OR "Just one more" than a sum with 10
f. $8 + 9 = 17$ Just one more than a double OR Trick with eight OR Trick with nine
g. $9 + 2 = 11$ Trick with nine OR "Just one more" than a sum with 10
